Inspiration and product brochure from NORNA PLAYGROUNDS

We design and manufacture natural playgrounds for the whole world, based on the children's needs to have their imaginations, creativity and motor skills stimulated. Our playground equipment appeals to both natural and free play for all children, using designs that are sustainable and safe.

WELCOME TO NORNA PLAYGROUNDS

NORNA PLAYGROUNDS is a **Nordic service and production company** which designs, produces and delivers the best quality natural playground equipment and playground solutions. Together with our distributors, we supply our products across most of the world.

NORNA PLAYGROUNDS is known for making playground equipment and creative natural playgrounds, all of which are designed and manufactured sustainably, in the best quality and with a focus on providing high play value.

We are always focused on investment in and development of our factory, technologies, processes and methods. This is to ensure that we can continue to supply the very best products and solutions to the market.

“Selling and buying a solution from NORNA PLAYGROUNDS should be a good and easy experience.”

This is NORNA PLAYGROUNDS' service vision. Therefore, our focus is always on the constant development of our Service and Support Centre. As distributors, you will receive 360 degree service and support – from concept to delivery. This is to ensure that our distributors have the best and most professional partners backing them up. We are experts in natural playgrounds and are known for our fast response time, quick deliveries, and so on.

Sustainability

Sustainability spans all facets at NORNA PLAYGROUNDS. Apart from FSC®-certified wood and an FSC®-certified factory, we work constantly towards minimising our environmental impact throughout the value chain.

Designed for sustainable and creative play

**I MAKE UP MY
OWN GAME**

**ANOTHER GOOD DAY AT
THE PLAYGROUND**

**DO NOT DISTURB
– I AM GROWING**

We would like to extend an invitation for **co-creation**

Norna Playgrounds would like to enter into strategic partnerships where we create something new. The knowledge and inspiration we get through our distributors and cooperation partners is used when we develop our products and processes so that they fulfil all requirements and needs in the best way possible. We are good team players, with insight into and respect for our partners. **We believe that we can achieve the best results together.**

Our factory – **your factory**

Sustainable Innovation

Play a part in the development of our factory and methods. Our factory your factory.

We are constantly working on developing our processes, production methods and sustainability. This means that our distributors and their customers receive the best, most effective and smartest solutions possible. Among other things, this has resulted in SMART ROBINIA®, SMART PACKING and the market's fastest response and delivery times.

As a distributor with NORNA PLAYGROUNDS, you get one of the best manufacturers and suppliers in Europe when it comes to sustainable production of natural playgrounds in Robinia wood.

SERVICE VISION

"Selling and buying a NORNA PLAYGROUNDS playground solution should be easy, profitable, sustainable and a good experience."

You will get a partner with **drive**

Our strong and professional Service and Support Centre offers our distributors a solid foundation from which to buy and sell our products. We provide quality professional, technical and design-related sparring, from concept to production and delivery.

We are quick and effective, without compromising quality and safety. We have high ambitions, which fuel our drive.

We provide our employees with the opportunity to develop personal resources and competences, which in turn strengthen their drive. We stick to our promises, and are quick to put words into action.

We make things happen.

Plug and play

As a distributor with NORNA PLAYGROUNDS, you will get a reliable and professional partner backing you up during and after a purchase.

We work together with distributors who have very different needs and are based in different countries and time zones. This is why we developed a flexible **360 degree service & support concept** - we call it "plug and play".

Plug and play service and support from NORNA PLAYGROUNDS means that a complete sales concept in 3 languages will be made available to distributors. Most sales and inspirational materials are available for download on our website.

In short, we are ready to provide **360 degree service to our distributors:**

- Inspiration and ideas.
- Pre-purchase information.
- Sales and inspirational materials.
- Sketch proposals if requested.
- Sustainable and professional production.
- Easy and safe installation with SMART ROBINIA® pre-drilled system.
- Thanks to SMARK PACKING, you will receive products packaged with consideration for the environment and a well-organised delivery.

We are known for having the fastest response and delivery times on the market!

SMART PACKING

When you receive a playground solution from NORNA PLAYGROUNDS, you will get a delivery that is considerate towards you and the environment.

The way we pack and deliver our equipment makes everything easy and sustainable.

- The shipment is split up and packed in smaller units. This allows us to deliver the products to otherwise inaccessible places.
- The playgrounds can be shipped as ordinary goods and sent together with other products. More in the vehicle – better for the environment.
- Each individual product is clearly marked with steel band. This makes it easy to spread out the equipment at the location and thus get a good overview before installation.
- We have reduced the amount of plastic and packaging that is used.

**NORNA PLAYGROUNDS
is the only company in the
world to develop a modular
pre-drilled system for
Robinia wood.**

**We call it
SMART ROBINIA®**

**Taming the “wild” Robinia wood
– with one of the world’s hardest
wood cores – requires knowledge,
will and a smart system. Welcome to
SMART ROBINIA®, which offers many
advantages:**

NORNA PLAYGROUNDS provides safety and security for our distributors. With SMART ROBINIA®, we have developed a unique, modular pre-drilled system for Robinia wood. Among other things, this ensures that our distributors and installers can easily and correctly install our equipment. All products with a product certificate from TÜV are pre-drilled with SMART ROBINIA®. Apart from ensuring correct and secure mounting, the time required to drill the equipment in place is reduced.

READ MORE ABOUT SMART ROBINIA® IN THE FOLDER.

**At NORNA PLAYGROUNDS
we are known as the crack team**

DID YOU KNOW THAT: Robinia comes with its **own natural defence** that ensures **excellent resistance to rotting and mould**. It is therefore possible to entirely **avoid using toxic treatment**.

Steel, brackets and screws

We primarily use high-quality stainless steel for our brackets and large steel components, e.g. slides, firepoles and brackets for swings and aerial ropeways. To a lesser extent we also use galvanised components. The quality of the screws are A2 or a corresponding standard.

The ropes

We use Taifun rope/ wires, which are a very wear-resistant product. It consists of a steel core encased in nylon.

The best warranties

We offer some of the industry's best warranties. We can do this because we only produce playground equipment of the best quality. Among other things, NORNA PLAYGROUNDS offers 15 years' warranty against degradation due rotting and mould for Robinia wood.

Choose a sustainable wood

Playground equipment from NORNA PLAYGROUNDS is developed with extreme care and using sustainable materials, which means it can have a very long lifetime.

NORNA PLAYGROUNDS primarily uses Robinia wood for its equipment. In addition, we also use Douglas and Siberian larch. These types of wood are generally delivered untreated. If you would like a colour applied to the equipment, our standard is a chestnut-coloured water-based treatment.

Long lifetime

Many types of wood have a limited lifetime upon contact with soil. This is where Robinia wood is different by having a lifetime of up to 32 years upon contact with soil.

Figure 1 shows the lifetimes of the different wood types upon contact with soil.

FSC® (Forest Stewardship Council®) is an international marking scheme for sustainable wood.

The FSC® mark documents that the products stem from forest areas that are used sustainably.

- The FSC® has a broad approach to sustainability – and it works with the financial, social and environmental aspects.
- The FSC® ensures that the number of trees chopped down does not exceed what the forest can replenish naturally.
- The FSC® ensures that rare plants, waterways and springs are protected.
- The FSC® forest ensures that endangered animals are safe, by protecting their habitat from logging.
- The FSC® ensures that a percentage of the total revenue from the forest is used to support the local society.
- The FSC® makes sure that forest workers receive a fair salary, safety equipment and training.

NORNA PLAYGROUNDS supports the UN's sustainable development goals. Global responsibility starts locally.

The UN's 17 sustainable development goals were adopted in 2015. They were created in answer to the great challenges faced by the world. Therefore, achieving them requires a collective effort, across national borders, from companies, organisations and citizens.

NORNA PLAYGROUNDS is particularly focused on 3 of these goals: Sustainable development goals 12, 15 and 17.

Read more at www.norna-playgrounds.com

Robinia wood has a number of unique properties

Apart from a long lifetime upon contact with soil, Robinia wood stands out by also ranking high on the list when it comes to pressure strength, tensile strength and bending strength.

We have great expertise and experience with the procurement of the best and most durable materials. Robinia posts from NORNA PLAYGROUNDS consist only of core wood, which is the innermost part of the trunk.

Play your part in sustainability and responsibility

NORNA PLAYGROUND feels responsible towards people, animals and nature. Our business and our strategy is based on sustainable principles. We want good social and environmental conditions for the people we do business with. NORNA PLAYGROUNDS only uses FSC®-marked wood for its production of playground equipment. NORNA PLAYGROUNDS takes a broad approach to sustainability – and works with the financial, social and environmental aspects. Furthermore, we support the UN's sustainable development goals.

Welcome to **sustainable and creative play**

High play value for all ages. Unique, quality playground equipment that fosters **great inspiration and creativity in children**. The play never stops.

- SMART ROBINIA® pre-drilled system, for easy and safe installation.
- High play value and creative free play.
- Quick delivery.
- Blends naturally into the surroundings.
- Sustainable production with FSC®-certified wood and from an FSC®-certified factory.
- SMART PACKING for environmentally-friendly delivery.
- Quality-assured and sustainable across the board, from concept to delivery.
- Low lifetime costs.
- Natural development of urban open spaces, parks, squares and institutions.

What is required?

A playground has many different users, with a wide range of ages and needs. There should be something for everyone, and the playground should retain a high attraction value for a long time.

The play and attraction value are usually enhanced when the playground equipment and the playground can create several rooms in the outdoor space.

We design and manufacture natural playgrounds for the whole world, based on the children's needs to have their imaginations, creativity and motor skills stimulated. Our playground equipment appeals to both natural and free play for all children, using designs that are sustainable and safe.

NORNA PLAYGROUNDS is here to **bring joy to children, naturally, creatively and sustainably as they grow up.**

With NORNA PLAYGROUNDS' design, we are constantly trying to support a sustainable, safe and creative space where children can grow up. A space where children can discover, learn and challenge themselves – entirely naturally.

A lot of growth takes place on the playground

We are also focused on the space between the playground equipment. A space where personalities, fantasy, creativity and friendships bloom.

Our sustainable product range consists of natural and classic designs within natural play. We are always working on new design solutions. All these solutions share a high play value, where the game is often made up by the players and can begin and develop in many different ways and from many different angles. Challenging without compromising quality, naturalness and safety.

8 good reasons to choose a SMART ROBINIA® playground from NORNA PLAYGROUNDS

- Consideration for the environment and for nature.
- High play value.
- Natural creativity and fantasy.
- Long lifetime.
- Easy to maintain.
- Blends naturally into the surroundings.
- Nice finish.
- Ensured correct installation, in accordance with the playground standard EN 1176.

Fitting out the playground

When a playground has to be fitted out, there are some important decisions to be made.

Which functions do you want the playground to support? There are many options, and the right composition and choice of equipment can ensure a combination of several functions:

- climbing
- inclusion
- sand and water play
- balance
- training
- exercise
- motor skills
- sensory play
- quiet areas

Planting and terrain

In the area where the playground should be placed, you can also consider changing the terrain. Most often, you will have excess soil that can easily be used for embankments and hills, which the children will enjoy.

Zones and rooms in the space

With sun shades, awnings, hammocks, sensory gardens and sensory elements, different zones and rooms can be created at the playground. Planting or hedges and palisades can also help encircle the playground and create rooms in the outdoor space.

The playground equipment and solutions for institutions, nurseries, schools, housing associations, public spaces and parks.

Our equipment is suitable for all ages – so both kids and adults can find something challenging. There are many application and combination options when using equipment from NORNA PLAYGROUNDS. For example, the motor skills courses can be used for motor sensory stimulation, as an obstacle course during gym class or as a training and exercise course for adults.

The playground equipment is designed with the aim of creating **many different possibilities** for using the equipment and **initiating play.**

Equipment from NORNA PLAYGROUNDS is designed so that, as a minimum, it is in compliance with the requirements for a safe playground as stipulated in EN 1176.

When you buy a playground from NORNA PLAYGROUNDS, you get a sustainable playground of the highest quality and made of the best materials. Our natural playgrounds are made primarily of Robinia wood combined with high-quality steel. We have made it easy and manageable for you to understand our products and solutions. Each product is specified with the associated certification and characteristics. The majority of our equipment is TÜV-certified. FSC® certification spans all products.

Below is an introduction to the certifications and markings that you can find under the products.

TÜV (Süd Product Service) is the leader in Europe within testing and certification of playground equipment in accordance with (European standard) EN 1176. A TÜV certificate is therefore your assurance that the playground equipment is made in accordance with applicable standards. All products with a product certificate from TÜV are pre-drilled with SMART ROBINIA®. In "certificate explorer" at www.tuev.sued.de you can see whether your supplier is certified.

You will find the SMART ROBINIA® brand next to the equipment made using NORNA PLAYGROUNDS' unique pre-drilled system. This brand is your guarantee for a high level of safety, easy installation, etc. Apart from ensuring correct and secure mounting, SMART ROBINIA® minimises the time required to handle the equipment during installation.

We have created the NORNA 100 symbol so that it is easy to find playground equipment where the fall height does not exceed 1 metre. The advantage with these products is that you typically do not need any protective surfaces other than well-established grass. The playground equipment with the NORNA 100 mark is therefore easier and cheaper to install.

The mark of responsible forestry

NORNA PLAYGROUND only uses FSC®-marked wood for its production of our playground equipment. FSC® (Forest Stewardship Council®) is an international marking scheme that documents that marked products originate from forest areas that are used sustainably. NORNA PLAYGROUNDS only uses FSC®-certified wood for our production. NORNA PLAYGROUNDS is also FSC®-certified as a factory.

Our sun shades are UV-certified by an accredited testing organisation, in accordance with the UV / 801 standard. UV 801 is an internationally-recognised mark for coatings and fabrics, which indicates the sunlight protection level. The marking takes the use of the fabric into account. The number specifies the sun protection factor, UPF. This certificate is your assurance that you get thoroughly-tested quality products with documented protection against the sun's ultraviolet rays.

Welcome to NORNA CORE

NORNA CORE represents the best known core products from NORNA PLAYGROUNDS. The NORNA CORE range is particularly known for well-built playground equipment manufactured using the best quality materials.

In the NORNA CORE range, you will find climbing towers, aerial ropeways and sand and water play. You will also find the beautiful and fun animal cut-outs and the large motor skills courses. All the primary products in this range are TÜV-certified.

All playground equipment with a product certificate from TÜV is produced with NORNA PLAYGROUNDS' pre-drilled system, SMART ROBINIA®.

The NORNA CORE range offers everything within:

- Balance, motor skills and climbing courses
- Climbing and tower systems
- Themes and wooden figures
- Slides
- Swings
- Playhouses
- Sand and water play
- Sensory play and herb gardens
- Aerial ropeways and seesaws
- Shelters and outdoor furniture
- Multi-sport and natural fitness

To see the complete selection of the NORNA CORE range, please check out our website:
<https://norna-playgrounds.com/norna-core>

The basic concept of NORNA PLAYGROUND natural play is play “without rules”, which the children create by themselves without outside control. Specifically, this means that we are always focused on designing playground equipment which can be used in as many ways as possible. For example, there are countless possibilities for what a climbing tower or the components of a balance course could be to a child.

There are **many combination options** with a high play value

The Gallic House

The Gallic Robinia playhouse is very popular, and a small cluster of several houses creates a wonderful camp atmosphere.

The house is raised slightly above the ground, with steps at the front. A spacious playhouse for all ages.

LE20100

Playhouses and sand **boost creativity.** They **stimulate** the children's **imagination** and **grand ideas.**

Playhouses

NORNA PLAYGROUNDS has playhouses of many different shapes and sizes. For the young and slightly older children, the sandbox area with a playhouse is the natural centre of their play. The Gallic House (LE20100) is a very popular choice here.

“House on a Hill” (LE20109) is another one of our popular and thoroughly tested products. The children will have a natural urge to get to higher ground. The entrances are made of tree stumps and ramps, so that the small adventurers can also test their balance skills. A slide is mounted on one side, offering lots of challenges – yet another example of playground equipment with a high play value.

Apart from tables, benches and shelves, which can be installed in the playhouses, there are also other options, such as an outdoor kitchen, petrol pumps and a car wash.

The children interact with the elements – **sand and water**.
Room for many building projects

Together with other playground equipment, the sand areas **support cooperation**, with room for **different activities** and spaces in the play area.

Sand is a wonderful material

Sand can do a lot of things. You can build with it, shape it and immerse yourself in it in a way that stimulates your senses. In combination with water, sand offers many more possibilities for activating your imagination and senses.

There are many options for adding elements to the sandbox, each creating different play universes. Sand tables, play surfaces or sand trays for building or eating on are very popular.

Sun shades are a flexible solution when you want shade for the sandbox. NORNA PLAYGROUND has a large assortment of sun shades in different sizes, which are presented elsewhere in this catalogue.

Sensory play and herb gardens

Our sensory play products are aimed at stimulating the children's sense of sight, smell and hearing. Senses that encourage quiet activities and interaction. Our products can be used individually or in conjunction with others to create calm oases in outdoor areas.

Room for **immersion and adventure** where herbs, flowers and useful plants are part of the activity.

Stimulate all **5 senses** with **herb gardens** and **plant boxes**. There is a lot that **grows** on the playground

All senses activated

The common element of all the sensory play products is that they create small rooms in the playground. The plant boxes provide a rich opportunity for playing, fun and learning. For example, follow the passage of the year and establish traditions of doing certain activities at different points. You will find a large selection, including wind chimes, herb garden, sensory walls with different carvings, pergola and sensory walls with bars or rio net.

With shelters, you can enjoy **activities out in nature all year** round

Barbecue huts, shelters, benches and tables

Shelters are outdoor gathering places, promoting togetherness, learning and play. The huts come in different sizes and with different functions.

These include:

- Barbecue hut
- Wood work shelter
- Lunch shelter
- Or shelter, tool shed or maybe a stage.

Often, schools like to hold lessons, like science, outside. We have therefore developed a school table with benches made of Robinia wood/larch.

Welcome to NORNA BASIC

The NORNA BASIC range consists of a long list of balance and climbing equipment. There is a clear concept behind all the equipment in the NORNA BASIC range. The fall height does not exceed 1 metre – therefore, there is usually no need for a protective surface other than well-established grass. In addition, all the equipment is pre-drilled with our unique SMART ROBINIA® pre-drilled system.

And like the rest of NORNA PLAYGROUNDS' products, the playground equipment in the NORNA BASIC range is made using FSC®-certified Robinia wood.

NORNA BASIC consists of:

- Balance, motor skills and climbing courses
- Hammocks and special needs

To see the complete selection of the NORNA BASIC range, please check out our website: <https://norna-playgrounds.com/norna-basic>

The natural playground equipment in the NORNA BASIC range consists of balance and climbing equipment which is all made with our SMART ROBINIA® pre-drilled system for Robinia wood. This results in a quick, hassle-free installation.

The equipment in the NORNA BASIC range has a fall height of under 1 metre. It can therefore be installed **directly on well-established grass** without a protective surface. This way **you save both time and money.**

NORNA PLAYGROUNDS' popular cotton hammocks are **durable, organic and high-quality**, resulting in a particularly soft experience **that stimulates the senses.**

Hammocks

Our sailor's hammocks are unique, as they have been designed with particular focus on safety.

The hammocks can be used individually, but are also perfect in combination with sun shades.

Create **many zones** in the playground and fulfil **different needs**

Balance and a good atmosphere

Hammocks are always a popular element on the playground. Hammocks are used for various purposes. If you want to create an area for relaxation, togetherness and cosiness, the hammock systems are very popular. Perhaps you would also like a tumbling area, perfect for more energetic play. Here, it is a good idea to install a few hammocks with some distance between them, so there is room for playing. The extremely strong and durable Taifun hammock (LE20914) is a common choice for playgrounds at schools. When used in playgrounds, hammocks provide a nice interplay with the other equipment and offer a scalable experience. An easy way to create zones that are suitable for different purposes.

Welcome to **NORNA SUN SHADES**

All NORNA PLAYGROUNDS' sun shades are tried and tested quality products, which have been used with great success at schools and institutions throughout Europe for many years. The range offers a flexible sun shade system with many different applications. For example, for quiet areas with hammocks, sensory gardens and sand boxes. NORNA SUN SHADES are flexible solutions that allow you to easily move the shades around as needed.

- Our sun shades are UV-certified in accordance with the UV-801 certification.
- Polyester has a UV value of 80, which protects against 98% of the sun's rays.
- HPDE has a UV value of 10, which protects against 90 % of the sun's rays.

To see the complete selection of NORNA SUN SHADES, including our extensive selection of sun shades and large sun shade systems, please see our website:

NORNA PLAYGROUNDS has a **large selection** consisting of numerous different **sun shade solutions**

NORNA PLAYGROUNDS keeps a large number of standard sizes of sun shades in stock. This means that we can ship sun shades to you from one day to the next. Sun shades from NORNA PLAYGROUNDS are made of two different types of material:

Polyester – 99% Water tight

200 gr/m²

Polyester sun shades come in an off-white colour. The polyester sun shade is closely woven and treated to ensure minimal penetration of the sun's UV rays. This, of course, gives the added advantage that you can sit outside longer and enjoy the weather without being affected by UV rays.

- The shade is 99% watertight and must therefore always be installed with a slight slant to ensure that the water can drain off.
- The polyester sun shade is certified to UV801 and has achieved UPF 80+.

This means that the sun shade protects against 98% of the dangerous UV rays.

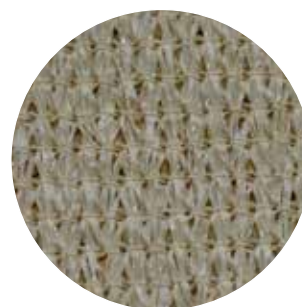

Sun shade POLYESTER

HDPE – Knotted sun shades:

320 gr / sq m– very durable

HDPE sun shades are also known as Australian sun shades. This is because this type of sun shade was first used in the harsh climate of Australia, and the qualities of the HDPE sun shade were adapted to suit this environment.

- The HDPE sun shade is made of a knotted material, which means that large amounts of water will drip through the sun shade.
- Smaller quantities of water will however drain off the shade, so remember to install it with a slight slant. The HDPE shades are certified to UV-801 and have achieved UPF 10+. This means that the sun shade protects against 90% of the dangerous UV rays.

Sun shade HPDE

Best seller

Many sun shades allow you to **set up modular shade areas** where the shades can easily be regulated. They are **fast and easy to set up and remove.**

When a sun shade is ordered with - i = inclusive: the bracket set is included for mounting. (includes rope clamps, screws, eyebolts and cords).

A safe choice

It is now generally well-known that the sun's rays are not exclusively a positive thing. Particularly around noon, children need to seek shade - even in the playground.

Our sun shades are tested and certified by an accredited testing organisation to comply with the new international UV-801 standard.

Sun shades allow you to provide sun shading wherever the children are playing. In addition, it is a flexible solution because the sun shades can easily be moved around when required.

Tailored sun shades

NORNA PLAYGROUNDS can also provide tailored sun shades.

In many cases, our customers prefer a solution that fits their surroundings precisely. We deliver tailored sun shades made of the same two materials as our standard sun shades.

Tailored sun shades can be made in the exact shape you specify

Concerning the sizes of the sun shades:

Generally, sun shades can be produced in any size. Very large shades, however, become hard to manage and the pull from the wind can be very powerful. We therefore recommend that sun shades are not made in sizes beyond 20 m², or with side lengths exceeding 5 m. If you would like to cover an area larger than 20 m², we recommend combining several smaller sun shades.

Recommendations from NORNA PLAYGROUNDS concerning sun shades and wind force:

Sun shades are very easy to handle. We recommend taking the sun shades down in the evening and when it is windy.

A sensible and easy practice is to check the Beaufort wind force scale for your local area.

Our sun shades are tailored according to your measurements and needs. However, **combining several small shades often does the job** without the need for tailored shades.

We recommend the following concerning removing the sun shades:

HDPE, when the wind force exceeds 7 on the Beaufort scale.

Polyester, when the wind force exceeds 5 on the Beaufort scale.

Tailored sun shades, when the wind force exceeds 5 on the Beaufort scale.

NORNA SUN SHADES allow for **many combination options** with our **flexible systems**

T8750

The sun shade cabin is a popular choice for **shade and shelter**. The sun shade cabin can **easily and quickly** be folded around its central post thus **freeing up** the area for **other purposes**.
